Your "college years" might be the most glorious extended holiday that you have in your life. Enjoy your adventurous journey on a quest for knowledge.

Specialization

Higher education theory, educational sociology

Brief explanation regarding specialization

With higher education, meaning university, graduate school and so forth, as my research theme, I have in interest in making comparisons of educational systems while citing methods under educational sociology and comparative education. In particular, my research covers the capability development of university faculty and personnel and graduate school education in Japan using the United States and the United Kingdom as a pair of mirrors facing each other.
